RE: H.R. 3377 and S.2080, The Genetically Engineered Food Right to Know Acts;  
H.R. 3883, The Genetically Engineered Food Safety Act

Dear Commissioner Henney:

This letter is short and simple. I support the above-mentioned petitions regarding genetically engineered foods. U.S. citizens want labeling and we want strict regulations for the health and safety testing of genetically modified organisms and the environmental risks associated with it. "We the people are the government", not the wealthy special interest groups. Sorry, but I don't trust the government with my health and until then, labeling should be mandatory.

Sincerely,

Judith Greilich
